

FILIP KRÁSA

From a young age, computers weren't just a tool for me — they were a fascination. I didn't just want to play games; I wanted to create. At 11, I started making youtube videos, honing my creative skills. But my real passion for IT ignited when I first encountered HTML in primary school. That moment shaped my path.

I dove deep into programming and web development, competing — and winning — in multiple IT competitions. Along the way, I developed a website for Cisco device configuration, which strengthened my networking expertise. My dedication led to a six-month internship at an IT company, where I worked on my high school graduation project.

Currently, I'm a student at the **Faculty of Informatics at Masaryk University**, balancing my studies with a **part-time job at CEITEC MU** and managing my own **cloud server** as a side project. My interests span from **machine learning to finance**, always driven by curiosity and the desire to build something meaningful.

PERSONAL

- Name**
Filip Krása
- Address**
Brno
- Email**
filip.krasa@live.com
- Date of birth**
17-08-2004
- Website**
